Founder & President  
of FIAM

## A Warm Welcome to the FIAM Community

We are delighted to unveil the first edition of our *FIAMxPRESS* newsletter. Over the next 12 months, expect this newsletter in your inbox six times, each edition bursting with exciting announcements, insightful interviews, and important updates that align with FIAM's mission.

*"Dive deeper into our essence and beliefs **HERE**"*

**MISSION**

## A Decade of Dynamic Connections: Celebrating Méchoui

This jubilant year sees the 10th milestone of Méchoui, our flagship event that not only showcases the dynamic presence of the Quebec financial community but also strengthens the crucial connections within the investment ecosystems of Montreal, Toronto, and beyond..

The Méchoui stands as an imperative event in Canada's financial calendar. More than a mere congregation, it's a nexus for forging and fortifying professional alliances, evident from this year's enthusiastic participation of 330+ individuals. Méchoui's format is a blueprint for success, with attendees looking forward to its consistent charm in upcoming editions.

## Infusing Innovation at Méchoui:

FIAM, always mindful of its mission, has innovated for this 10th anniversary. We have incorporated educational activities such as (conferences, workshops, collaborative undertaking between the industry and academia). All are honed in **on our operational niche: the confluence of data science, AI/ML financial prowess, especially in asset management. This is the path FIAM has chosen to contribute to the development and competitiveness of the financial community.** Mark your calendars for the 2024 edition on August 29th at the majestic Belvedere Pavillion at the Paddock. Stay tuned for more exhilarating content.

## The "Bloomberg-CDPQ" 2023 Confluence

Prior to the splendors of Méchoui, a distinguished event unfurled at the CDPQ premises. The ceremony began with Claude Perron emphasizing the event's cardinal role in FIAM's vision. The agenda, centered around Shawn Edwards, Bloomberg's CTO, saw an overwhelming gathering of some 100 attendees. This was made possible, thanks to Quebec's financial giants – CDPQ, PSP, and DGAM, supported by Innocap and Bodhi Research's patronage. A subsequent panel discussion explored the pressing and prospective concerns regarding integrating cutting-edge AI/ML technologies, including LLM models like GPT, in the financial domain. The dialogue highlighted the potentialities and impediments of this integration.
