2021 VIRTUAL EVENT

AUGUST 19th 2021 1:00PM-3:00PM

Artificial Intelligence is transforming industries and reshaping how information is used and how decisions are made by integrating accelerated analytics, text, speech, and images on a nearly unfathomable scale.

This event is part of a **Data Science and AI Series** first organized by the CFA of San Francisco in partnership with the FDP Institute.

FIAM's has adopted this generic theme, and in partnership with professional associations and selected partners /sponsors globally, will organize webinar style events to sensitize / inform /share views on issues, challenges and opportunities brought by disruptive technologies in Finance/ assets management.

The central theme of this first webinar is **The Rise of the Financial Data Scientist**, a theme inspired by Refinitiv's recent survey. This event is offered in partnership with AIMA Canada, in collaboration with the FDP Institute, the CAIA Association and other partners/sponsors.

Objectives

- Increase awareness on the growing use of AI/ML in Finance – opportunities, issues & implementation challenges
- Contribute to the development of a talent community for the finance /assets management sector.

The Rise of the Financial Data Scientist
